Contents

Mechanics of materials, I saw and participated: a reminiscence 1
Y. Yamada

Bulk forming

An investigation on the hot extrusion process of magnesium alloy sheet 6
S.-H. Hsiang, J.-L. Kuo

Development of simulation code for calculating residual stress distribution in D-I cans produced by both-sided ironing process . . 13
S. Kuriyama, Y. Yoshida, T. Takahashi, S. Kumagaya, T. Aoki, K. Miyauchi

A backward extrusion analysis by the rigid–plastic integralless–meshless method. 19
Y.-M. Guo, K. Nakanishi

Influence of the roughness geometry of tool surface and the flow stress of coated solid lubricants on tribo-conditions in cold forging 25
H. Saiki, Y. Marumo

Simulation of ultrasonic-vibration drawing using the finite element method (FEM) 30
M. Hayashi, M. Jin, S. Thipprakmas, M. Murakawa, J.-C. Hung, Y.-C. Tsai, C.-H. Hung

Three-dimensional bulk metal forming simulations under a PC cluster environment 36
J.S. Cheon, S.Y. Kim, Y.T. Im

Application of numerical simulation for wear analysis of warm forging die. 43
R.S. Lee, J.L. Jou

The friction modeling of different tribological interfaces in extrusion process 49
T.-C. Hsu, C.-C. Huang

Influences of the geometrical conditions of die and workpiece on the barreling formation during forging–extrusion process 54
S.Y. Lin, F.C. Lin

Axial crush of hollow cylindrical structures with various polygonal cross-sections. Numerical simulation and experiment. 59
M. Yamashita, M. Gotoh, Y. Sawairi

FE approach and experiments for an axisymmetric micro-yoke part forming using grain element and grain boundary element . . . 65
T.W. Ku, B.S. Kang

Hydraulic-pressure-enhanced cup-drawing processes—an appraisal. 70
S. Thiruvarudchelvan, F.W. Travis

Surface characteristics of oxide scale in hot strip rolling 76
W. Sun, A.K. Tieu, Z. Jiang, C. Lu, H. Zhu

Study on constitutive relation of AISI 4140 steel subject to large strain at elevated temperatures 84
S.I. Kim, Y. Lee, S.M. Byon

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS Direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier books and journals. You can register for **ContentsDirect** online at: **http://contentsdirect.elsevier.com**

Elsevier B.V.

CAD/CAM/CAE

Neural network approach to recognize the grid patterns in experimental mechanics 90
J.P. Wang, Y.C. Chueh

Constructing an intelligent conceptual design system using genetic algorithm 95
J.-J. Lin

Development of a CAD/CAE/CAM system for a robot manipulator 100
H.S. Lee, S.L. Chang

An adaptive slicing approach to modelling cloud data for rapid prototyping 105
Y.F. Zhang, Y.S. Wong, H.T. Loh, Y.F. Wu

Gate location design in injection molding of an automobile junction box with integral hinges 110
H.S. Kim, J.S. Son, Y.T. Im

Development of a remote quick CAE system on sculptured metal extrusion die surface 116
Y.-C. Kao

A fuzzy algorithm for flatness control in hot strip mill 123
H.T. Zhu, Z.Y. Jiang, A.K. Tieu, G.D. Wang

Three-dimensional finite element mesh generation from measured data of a stamping die 129
C.-E. Tsai, F.-K. Chen

Composites and Polymeric materials processing

A new approach of online waste removal process for laminated object manufacturing (LOM) 136
Y.S. Liao, L.C. Chiu, Y.Y. Chiu

Surface characterization in ultra-precision machining of Al/SiC metal matrix composites using data dependent systems analysis. 141
C.F. Cheung, K.C. Chan, W.B. Lee

Fuzzy regression approach to modelling transfer moulding for microchip encapsulation 147
K.W. Ip, C.K. Kwong, Y.W. Wong

A study on the grindability of multidirectional carbon fibre-reinforced plastics 152
N.S. Hu, L.C. Zhang

Effect of crease depth and crease deviation on folding deformation characteristics of coated paperboard. 157
S. Nagasawa, Y. Fukuzawa, T. Yamaguchi, S. Tsukatani, I. Katayama

Application of mushy/semi-solid joining—Part 3 163
M. Kiuchi, J. Yanagimoto, S. Sugiyama

Numerical and experimental study on the gravitation and surface tension effects on flow injection in center-gated disks 167
C.T. Li

Preventing non-uniform shrinkage in open-die hot embossing of PMMA microstructures 173
C.-R. Lin, R.-H. Chen, C. Hung

Automatic fabrication for bridged laminated object manufacturing (LOM) process 179
Y.Y. Chiu, Y.S. Liao, C.C. Hou

Evaluation of effective material properties of composite materials using special FEM. 185
C. Yang, H. Huh, T.H. Hahn

Increased accuracy by using dynamic finite element method in the constrain-surface stereolithography system 191
Y.-M. Huang, J.-Y. Jeng, C.-P. Jiang

The impact characteristics of Ti–6Al–4V plates hardfacing by laser alloying NiAl + ZrO_2 powder. 197
C.-K. Sha, J.-C. Lin, H.-L. Tsai

Material-removal processes

The technology combined electrochemical mechanical polishing 203
Y.-L. Chen, S.-M. Zhu, S.-J. Lee, J.C. Wang

The effects of electropolishing (EP) process parameters on corrosion resistance of 316L stainless steel 206
S.-J. Lee, J.-J. Lai

An NC tool path translator for virtual machining of precision optical products 211
W.B. Lee, D. Gao, C.F. Cheung, J.G. Li

Ultra precision grinding of spherical convex surfaces on combination brittle materials using resin and metal bond cup wheels . . 217
W.K. Chen, H. Huang

An assessment of the applicability of cold air and oil mist in surface grinding. 224
T. Nguyen, L.C. Zhang

Evaluation of cutter orientations in high-speed ball end milling of cantilever-shaped thin plate 231
C.M. Lee, S.W. Kim, K.H. Choi, D.W. Lee

Burr minimizing scheme in drilling. 237
S.-L. Ko, J.-E. Chang, G.-E. Yang

Probability of precision micro-machining of insulating Si_3N_4 ceramics by EDM 245
A. Muttamara, Y. Fukuzawa, N. Mohri, T. Tani

Freeform surface finish of plastic injection mold by using ball-burnishing process 248
F.-J. Shiou, C.-H. Chen

Optimization of electrochemical polishing of stainless steel by grey relational analysis. 255
P.S. Kao, H. Hocheng

A closed form solution for laser drilling of silicon nitride and alumina ceramics 260
C.Y. Ho, J.K. Lu

A material removal analysis of electrochemical machining using flat-end cathode 264
H. Hocheng, Y.H. Sun, S.C. Lin, P.S. Kao

Study on wear mechanisms in drilling of Inconel 718 superalloy 269
Y.C. Chen, Y.S. Liao

Study of electrical discharge machining technology for slicing silicon ingots. 274
W.Y. Peng, Y.S. Liao

The polishing mechanism of electrochemical mechanical polishing technology 280
S.-J. Lee, Y.-M. Lee, M.-F. Du

Experimental investigation into electrochemical micromachining (EMM) process. 287
B. Bhattacharyya, J. Munda

A mesoplasticitiy analysis of cutting friction in ultra-precision machining. 292
W.B. Lee, C.F. Cheung, S. To

The surface characteristics of P/M high-speed steel (ASP 23) multi-cut with wire electrical discharge machine (WEDM). 298
C.A. Huang, C.C. Hsu, H.H. Kuo

Investigation of micro-EDM material removal characteristics using single *RC*-pulse discharges 303
Y.S. Wong, M. Rahman, H.S. Lim, H. Han, N. Ravi

Cutting performance of diamond tools during ultra-precision turning of electroless-nickel plated die materials 308
A. Pramanik, K.S. Neo, M. Rahman, X.P. Li, M. Sawa, Y. Maeda

Development and characterisation of direct laser sintering Cu-based metal powder. 314
H.H. Zhu, L. Lu, J.Y.H. Fuh

A study on the machining of high-aspect ratio micro-structures using micro-EDM. 318
H.S. Lim, Y.S. Wong, M. Rahman, M.K. Edwin Lee

Performance evaluation of pure CBN tools for machining of steel 326
K.S. Neo, M. Rahman, X.P. Li, H.H. Khoo, M. Sawa, Y. Maeda

Fabrication of micro-electrodes by multi-EDM grinding process. 332
F.-T. Weng, R.F. Shyu, C.-S. Hsu

Comprehensive analysis of delamination in drilling of composite materials with various drill bits 335
H. Hocheng, C.C. Tsao

The investigation on the prediction of tool wear and the determination of optimum cutting conditions in machining 17-4PH stainless steel 340
W.-T. Chien, C.-S. Tsai

Orientation changes of aluminium single crystals in ultra-precision diamond turning 346
S. To, W.B. Lee, C.F. Cheung

Characteristics of high speed micro-cutting of tungsten carbide 352
K. Liu, X.P. Li, M. Rahman

Nano-precision measurement of diamond tool edge radius for wafer fabrication. 358
X.P. Li, M. Rahman, K. Liu, K.S. Neo, C.C. Chan

Studies on electric-discharge machining of non-contact seal face grooves 363
S.L. Chen, Q.C. Hsu

Direct laser sintering of a copper-based alloy for creating three-dimensional metal parts. 368
Y. Tang, H.T. Loh, Y.S. Wong, J.Y.H. Fuh, L. Lu, X. Wang

Mechano-chemical polishing of silicon wafers 373
C.-C.A. Chen, L.-S. Shu, S.-R. Lee

Nano-materials processing

Microformability of optical glasses for precision molding 379
Y. Saotome, K. Imai, N. Sawanobori

Mechanical properties study and design of a suspension system by considering tension force 385
B.-Y. Moon, K. Showa, S.-W. Chung

Precision casting

The effect of casting temperature on the properties of squeeze cast aluminium and zinc alloys 391
L.J. Yang

Powder forming

Rapid debinding of 316L stainless steel injection moulded component 397
M.A. Omar, R. Ibrahim, M.I. Sidik, M. Mustapha, M. Mohamad

Densification modelling for nanocrystalline metallic powders. 401
H.S. Kim

Production of long rods by sequential extrusion of wood powders 407
T. Miki, N. Takakura, T. Iizuka, K. Yamaguchi, K. Kanayama

Porous AlN ceramic substrates by reaction sintering 413
F.Y.C. Boey, A.I.Y. Tok

Spark plasma sintering and in vitro study of ultra-fine HA and ZrO_2–HA powders. 420
R. Kumar, P. Cheang, K.A. Khor

Sheet metal forming

Study on superplastic blow-forming in a rectangular closed-die 426
Y.M. Hwang, H.S. Lay

An elasto-plastic finite-element analysis of sheet metal camber process. 432
Y.-M. Huang, T.-C. Chen

Analysis of plastic bending of adhesive-bonded sheet metals taking account of viscoplasticity of adhesive 441
M. Takiguchi, F. Yoshida

Fundamental studies on the incremental sheet metal forming technique. 447
J.-J. Park, Y.-H. Kim

Design of rolling pass schedules to improve grain-size uniformity in thickness 454
J.-J. Park, S.-J. Lee

Evaluation of wear mechanisms of Y-TZP and tungsten carbide punches. 460
M.H. Myint, J.Y.H. Fuh, Y.S. Wong, L. Lu, Z.D. Chen, C.M. Choy

Modified looping technique for remeshing of forming simulations with free surface folding 465
I.H. Son, Y.W. Han, H.S. Kim, Y.T. Im

Analytical model for prediction of deformed shape in three-roll rolling process 471
J.H. Min, H.C. Kwon, Y. Lee, J.S. Woo, Y.T. Im

Prediction of spread, pressure distribution and roll force in ring rolling process using rigid–plastic finite element method 478
Y. Yea, Y. Ko, N. Kim, J. Lee

Determination of forming limit of a structural aluminum tube in rubber pad bending 487
J.W. Lee, H.C. Kwon, M.H. Rhee, Y.T. Im

Effects of temperature on yield locus for 5083 aluminum alloy sheet 494
T. Naka, Y. Nakayama, T. Uemori, R. Hino, F. Yoshida

Rotary straightening of curved shape near both ends of seamless pipe 500
K. Kawai, Y. Tatsuki, H. Kudo

Development of an applied roll forming pass design expert system based on the shape element idea 505
X. Shen, J. Liu, X. Wang, C.-C. Huang

Experiment investigation of deep-drawing sheet texture evolution. 509
Y. Liu, J. Sun, L. Zhou, Y. Tu, F. Xing, Y. Guo, Q. Tong

FEM analysis of contact mechanism in press-forming of lubricant pre-coated steel sheet 514
Z. Wang, T. Nakamura, K. Dohda, T. Obika

Optimization of loading conditions for tube hydroforming 520
K.-J. Fann, P.-Y. Hsiao

Simulation of solidification of lubricant in metal forming 525
T. Sawada, T. Ohta

An analysis of the eccentric nosing process of metal tubes 530
C.-T. Kwan

Effect of rolling parameters on cold rolling of thin strip during work roll edge contact 535
Z.Y. Jiang, H.T. Zhu, A.K. Tieu

Finite element simulation of cold rolling of thin strip 542
Z.Y. Jiang, A.K. Tieu, X.M. Zhang, C. Lu, W.H. Sun

Lubricity of volatile lubricants in sheet metal rolling 548
Z. Wang, K. Dohda, Y.-H. Jeong

A comparative estimation of the forming load in the deep drawing process 555
F. Fereshteh-Saniee, M.H. Montazeran

Modeling and optimization of threading process for shape control in tandem cold rolling 562
D.D. Wang, A.K. Tieu, C. Lu, G. D'Alessio, W.Y.D. Yuen

Modeling of the inlet zone in the mixed lubrication situation of cold strip rolling 569
C. Lu, A. Kiet Tieu, Z. Jiang

Study of ductile fracture and preform design of upsetting process using adaptive network fuzzy inference system 576
Y.-H. Lu, F.-H. Yeh, C.-L. Li, M.-T. Wu, C.-H. Liu

Finite element analysis of strain conditions after equal channel angular extrusion 583
Y.-L. Yang, S. Lee

Grain refining of magnesium alloy AZ31 by rolling 588
T.-C. Chang, J.-Y. Wang, C.-M. O, S. Lee

Hole and lead plug effect on fiber reinforced elastomeric isolator for seismic isolation 592
B.-S. Kang, G.-J. Kang, B.-Y. Moon

Investigation on comparisons between two analytical models of sandwich sheet rolling bonded before rolling 598
M.N. Huang, G.Y. Tzou, S.W. Syu

Two analytical models of double-layer clad sheet compression forming based on the upper bound and the slab methods 604
H.-H. Hsu, G.-Y. Tzou

A vertical-type twin roll caster for aluminum alloy strips 610
T. Haga, K. Takahashi, M. Ikawa, H. Watari

Efficiency enhancement in sheet metal forming analysis with a mesh regularization method 616
J.H. Yoon, H. Huh

Analytical modified model of the cold bond rolling of unbounded double-layers sheet considering hybrid friction 622
G.-Y. Tzou, M.-N. Huang

Simulation of sheared edge formation process in blanking of sheet metals 628
N. Hatanaka, K. Yamaguchi, N. Takakura, T. Iizuka

Comparison of asperity flattening under different wavelength models for sheet metal forming 635
B. Ma, A.K. Tieu, C. Lu, Z.Y. Jiang

Semi-conductors materials processing

Deformation and material removal rate in polishing silicon wafers 641
I. Zarudi, B.S. Han

Finite element modeling for chemical mechanical polishing process under different back pressures 646
Y.-Y. Lin, S.-P. Lo

The application of the moment equilibrium model to the offset of pressure center of trimming progressive die in IC packaging machine 653
Z.-C. Lin, C.-C. Chen

Synthesis of Ti(C, N, O) coatings by unbalanced magnetron sputtering 662
J.H. Hsieh, C. Li, W. Wu, A.L.K. Tan

Others

Low-cost infrared sensing system for monitoring the welding process in the presence of plate inclination angle 668
H. Fan, N.K. Ravala, H.C. Wikle III, B.A. Chin

Sensitivity analysis for process parameters influencing weld quality in robotic GMA welding process 676
I.S. Kim, Y.J. Jeong, I.J. Son, I.J. Kim, J.Y. Kim, I.K. Kim, P.K.D.V. Yaragada

The effects of various ceramic–metal on wear performance of clad layer 682
S.W. Wang, Y.C. Lin, Y.Y. Tsai

Investigation of PVD coating on corrosion resistance of metallic bipolar plates in PEM fuel cell 688
S.-J. Lee, C.-H. Huang, Y.-P. Chen

Microstructural characteristics on the surface and subsurface of semimetallic automotive friction materials during braking process 694
R.J. Talib, A. Muchtar, C.H. Azhari

Applying liquid film protection method to solid-state bonding process of AA7075 aluminum alloys. 700
Y.-E. Wu, Y.-L. Lo

Computational model of a Shinkansen train running on the railway structure and the industrial applications 705
M. Tanabe, H. Wakui, N. Matsumoto, H. Okuda, M. Sogabe, S. Komiya

A study on machinability of Al/SiC-MMC. 711
A. Manna, B. Bhattacharayya
